MISSION VALLEY BANCORP | 2023 Annual Report

MISSION VALLEY BANCORP

WE BELIEVE IN THE POWER OF RELATIONSHIP BANKING TO CREATE LASTING PARTNERSHIPS WITH OUR CLIENTS. OUR DEDICATED TEAM PROVIDES HIGH-TOUCH, PERSONALIZED SERVICE, ENSURING THAT OUR CLIENTS RECEIVE THE INDIVIDUAL ATTENTION AND SUPPORT THEY DESERVE.

TAMARA GURNEY

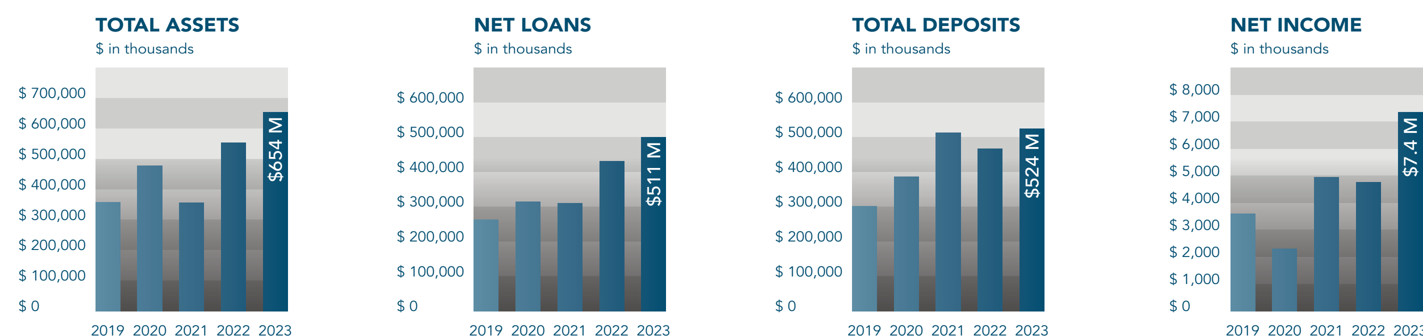
TO OUR SHAREHOLDERS, CLIENTS, AND FRIENDS

On behalf of Management and the Board of Directors, I am pleased to share that Mission Valley Bancorp closed its twenty-third year posting record profitability. Generating Net Earnings of $7.4 million or $2.22 per diluted share for the year ended December 31, 2023, compared to net income of $4.8 million, or $1.45 per diluted share, for the year ended December 31, 2022. Mission Valley Bank was awarded a $5.0 million grant from the U.S. Treasury in the second quarter as part of the Community Development Financial Institutions ("CDFI") Equitable Recovery Program ("ERP"). The CDFI's ERP was designed to expand lending, grant making and investment activities throughout low- or moderate-income communities. Mission Valley's strong track record as an active Community Development Financial Institution, coupled with the Bank's robust community outreach programs and safety & soundness, enabled us to qualify for this and other grant opportunities, resulting in total grant income of $5.4 million in 2023 as compared to $0.2 million in 2022.

2023 Performance Highlights:

- Record Net Income of $7.4 million, or $2.22 per diluted share.
- Gross Loans increased $81.6 million, or 18.65%, to $519.0 million as of December 31, 2023.
- Loan production totaled $140.9 million in 2023, which was primarily driven by Small Business Administration ("SBA"), Commercial Real Estate, and Commercial loans.
- Total Assets were $653.7 million as of December 31, 2023, an increase of $100.4 million, or 18.15%, compared to December 31, 2022.
- Net Interest Income increased by $3.9 million, or 19.13%, to $24.2 million in 2023.
- Non-Interest Income increased by $3.9 million, or 46.98%, to $12.3 million in 2023.
- Awarded $5.0 million grant from the U.S. Treasury as part of the Community Development Financial Institutions ("CDFI") Equitable Recovery Program ("ERP"), which was received and fully recognized into Non-Interest Income in 2023 after meeting the eligible activities and performance conditions of the grant award agreement.
- Sold $39.1 million in SBA loans resulting in gain on sale of $2.6 million in 2023, compared to $74.3 million in SBA loans sold and gain on sale of $4.0 million in 2022.
- Allowance for Credit Losses of $7.2 million with Allowance for Credit Losses Ratio of 1.39%.

Despite the economic uncertainties faced throughout the year, both loan demand and quality remained strong, enabling Mission Valley to achieve continued loan growth of $81.6 million, closing 2023 with Net Loans of $511 million as of December 31, 2023, up $80.2 million or 18.6% from the $430.8 million reported as of December 31, 2022. Primarily driven by loan growth and the new accounting standard for Current Expected Credit Losses ("CECL"), Provision for Credit Losses was increased by $250,000 in 2023, to $1.4 million, compared to $1.1 million in 2022.



2023 Loan production was strong, reaching $140.9 million, through the origination of Commercial, Commercial Real Estate, SBA and Accounts Receivable Financing loans. This strength of production, allowed for the sale of $39.1 million in SBA loans, resulting in a gain on sale of $2.6 million during 2023. This accelerated production along with the rise in interest rates also drove the increase in Net Interest Income by $3.9 million, or 19.13%, reaching $24.2 million for the year ended December 31, 2023.

Total Deposits grew by 12.2%, reaching $524.3 million, closing the year up $57 million. Driven by rising interest rates and growth in interest-bearing deposits and borrowings, total interest expense rose $7.6 million to $9.3 million for the year ended December 31, 2023, from $1.8 million for the year ended December 31, 2022.

Mission Valley Bancorp's capital position remains healthy, reporting a Leverage Ratio of 10.33%, Common Equity Tier 1 Capital Ratio of 9.98%, Tier 1 Capital ratio of 11.03%, and total Risk Based Capital Ratio of 12.28%. All continuing to exceed regulatory requirements.

Additionally, our subsidiary company, Mission SBA Loan Servicing LLC (dba "Total SBA") launched in 2021, having quickly established itself as the premier SBA Lender Service Provider in the nation, has a growing SBA servicing portfolio of more than $385 million as of December 31, 2023.

Overall, Mission Valley was able to achieve strong financial performance and growth, despite the difficult environment and challenges that 2023 presented, due to the strength of our team, balance sheet, capital position, and prudent measures that we have taken. We remain confident that we are well positioned to both seize the opportunities presented and successfully weather the challenges that 2024 may bring.

As a result of the strong 2023 financial performance and capital position, Mission Valley's board of directors declared a cash dividend of $0.15 per share on February 27, 2024, for the third year in a row. The dividend will be payable on or about April 2, 2024 to shareholders of record as of the close of business on March 20, 2024.

Looking forward to the year ahead, we are working diligently on our branch expansion project in Burbank, targeted for completion by the end of the second quarter, core deposit initiatives to bolster liquidity, and digital transformation projects to improve productivity, add functionality/capabilities, and expand our outreach. We are also re-evaluating our dividend plan including the size and frequency of cash dividends to shareholders, which we expect to announce early in the second quarter. Mission Valley Bancorp is well positioned to maintain our course of steady and controlled growth throughout 2024 and beyond. On behalf of everyone at Mission Valley, please accept our sincere appreciation for your continued confidence and support.

Report of Independent Auditors

The Board of Directors and Shareholders
Mission Valley Bancorp

Report on the Audit of the Financial Statements

Opinion

We have audited the consolidated financial statements of Mission Valley Bancorp and its subsidiaries, which comprise the consolidated statements of financial condition as of December 31, 2023 and 2022, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Mission Valley Bancorp and its subsidiaries as of December 31, 2023 and 2022, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Mission Valley Bancorp and its subsidiaries and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note 1 to the financial statements, in the year ended December 31, 2023, Mission Valley Bancorp and its subsidiaries adopted new accounting guidance Accounting Standards Update 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. Mission Valley Bancorp and its subsidiaries adopted the new credit loss standard using the modified retrospective approach such that prior period amounts are not adjusted and continue to be reported in accordance with the previously applicable generally accepted accounting principles. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Mission Valley Bancorp and its subsidiaries' ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Mission Valley Bancorp and its subsidiaries' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Mission Valley Bancorp and its subsidiaries' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The consolidating statements of financial condition and income are presented for purposes of additional analysis and are not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the consolidated financial statements as a whole.

Note 1 – Summary of Significant Accounting Policies

Nature of operations – Mission Valley Bancorp (the “Company”) is a bank holding company headquartered in Sun Valley, California with two wholly owned subsidiaries Mission Valley Bank (the "Bank") and Mission SBA Loan Servicing LLC (“Mission SBA”). The Bank was founded in 2001, as a state chartered depository institution subject to regulation and examination by the California Department of Financial Protection & Innovation (“DFPI”) and Federal Deposit Insurance Corporation (“FDIC”). The Bank provides a full range of banking services to corporate and individual customers and has two branches located in Sun Valley and Valencia, California.

Mission SBA was established in 2021, as a lender service provider (“LSP”) that provides lending services, such as underwriting, processing, closing, servicing, and referral/placement services, to other financial institutions.

Basis of presentation and consolidation – The accompanying consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) and general practices within the banking industry. The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Mission Valley Bank and Mission SBA. All significant intercompany balances and transactions have been eliminated in consolidation.

In 2005, the Company issued $6,186,000 of junior subordinated deferrable interest debentures through Mission Valley Statutory Trust I, a variable interest entity. The Company determined that it is not the primary beneficiary of Mission Valley Statutory Trust I, therefore Mission Valley Statutory Trust I is not consolidated in the Company’s financial statements. As a result, the consolidated statements of financial condition include $6,186,000 as junior subordinated deferrable interest debentures. Also included in other assets in the consolidated statements of financial condition is $186,000 of investments in Mission Valley Statutory Trust I, which is reported using the cost method.

Use of estimates – The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated statements of financial condition, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for credit losses, valuation of investment securities, valuation of deferred tax assets, and share-based compensation.

Note 1 – Summary of Significant Accounting Policies (continued)

Adoption of new accounting standards – On January 1, 2023, the Company adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”) 2016-13 Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments, which replaces the incurred loss methodology with an expected loss methodology that is referred to as the current loss (“CECL”) methodology. The measurement of expected credit losses under the CECL methodology is applicable to financial assets measured at amortized cost, including loan receivables and held-to-maturity debt securities. It also applies to off-balance sheet credit exposures not accounted for as insurance (loan commitments, standby letters of credit, financial guarantees, and other similar instruments) and net investments in leases recognized by a lessor in accordance with Topic 842 on leases. Additionally, Accounting Standards Codification (“ASC”) Topic 326 (“ASC 326”) made changes to the accounting for available-for-sale debt securities. One such change is to require credit losses to be presented as an allowance rather than as a write-down on available-for-sale debt securities management does not intend to sell or believes that it is more likely than not they will not be required to sell.

The Company adopted ASC 326 using the modified retrospective method for all financial assets measured at amortized cost, and off-balance-sheet credit exposures. Results for reporting periods beginning after January 1, 2023 are presented under ASC 326, while prior amounts continue to be reported in accordance with previously applicable GAAP. The adoption resulted in an increase of $370,000 to our allowance for credit losses on loans, an increase of $65,000 to our allowance for credit losses on off-balance-sheet credit exposures, and a net-of-tax cumulative-effect adjustment of $306,000 to decrease the beginning balance of retained earnings.

On January 1, 2023, the Company adopted ASU 2022-02 Financial Instruments – Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures, which eliminated the accounting guidance for troubled debt restructurings (“TDR”) by creditors while enhancing disclosure requirements for certain loan refinancings and restructurings by creditors when a borrower is experiencing financial difficulty. The adoption did not result in a change to the Company’s allowance for credit losses on loans and allowance for credit losses on off-balance-sheet credit exposures at January 1, 2023.

The effective interest rate used to discount expected cash flows considers the timing of expected cash flows resulting from expected prepayments for troubled debt restructuring that existed at January 1, 2023. The prepayment-adjusted effective interest rate uses the original contractual rate and prepayment assumptions at January 1, 2023.

Note 1 – Summary of Significant Accounting Policies (continued)

The Company finalized the adoption of ASC 326 as of January 1, 2023 as detailed in the following table:

	January 01, 2023		
(In thousands)	As Reported Under ASC 326	Pre-ASC 326 Adoption	Impact of ASC 326 Adoption
Assets:			
Loans			
Real estate loans	$ 3,994	$ 3,182	$ 812
Commercial loans	1,027	771	256
Consumer loans	39	7	32
SBA loans	779	1,238	(459)
Accounts receivable loans	395	668	(273)
Advanced restaurant financing loans	40	40	-
Overdrafts	-	4	(4)
Unallocated	5	(1)	6
Allowance for credit losses on loans	6,279	5,909	370
Liabilities:			
Allowance for credit losses on off-balance-sheet credit exposures	74	9	65

Concentrations of credit risk – Assets and liabilities that subject the Company to concentrations of credit risk consist of interest-bearing deposits at other banks, investments available-for-sale, loans, and deposits. Most of the Company's customers are located within Los Angeles County and surrounding areas. For the years ended December 31, 2023 and 2022, the Company did not have any significant concentrations in its business with any one customer.

As of December 31, 2023 and 2022, the Company has cash deposits at other financial institutions in excess of the FDIC insured limits. The Company places these deposits with major financial institutions and monitors the financial condition of these institutions. Management believes the risk of loss associated with such deposits to be minimal.

The Company's loan portfolio consists primarily of loans to borrowers within Southern California. Although the Company has a diversified loan portfolio, a substantial part of the debtors' ability to honor their contracts is dependent upon the economic conditions in this region. Real estate secured loans represented approximately 51% and 54% of total gross loans held for investment at December 31, 2023 and 2022, respectively. Management has taken this factor into account in the determination of the allowance for loan losses.

Note 1 – Summary of Significant Accounting Policies (continued)

Cash and due from banks – Banking regulations require that banks maintain a percentage of their deposits as reserves in cash or on deposit with the Federal Reserve Bank. The Company was in compliance with its reserve requirements as of December 31, 2023 and 2022.

Cash equivalents include federal funds sold, securities, and interest-bearing deposits in other banks with original maturities of ninety days or less. There were no cash equivalents as of December 31, 2023 and 2022.

Interest-bearing deposits in other banks – Interest-bearing deposits in other banks are purchased with an original maturity date greater than ninety days and are carried at amortized cost. Interest-bearing deposits in other banks include certificates of deposit in major financial institutions located throughout the United States of America.

Securities – In accordance with generally accepted accounting principles, the Company is required to designate its readily marketable investment securities as "held-to-maturity," "available-for-sale," or "trading." Debt securities that the Company has both the intent and ability to hold those securities to maturity regardless of changes in market conditions, liquidity needs, or changes in general economic conditions are classified as "held-to-maturity" and reported at amortized cost. The Company did not classify any debt securities as "held-to-maturity" at December 31, 2023 and 2022.

Debt securities classified as available-for-sale are reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity as an item of other comprehensive income. Investment transactions are recorded on the trade date.

The Company did not designate any of its investments as trading securities at December 31, 2023 and 2022.

Gains and losses realized on disposition of investment securities are recognized at the time of sale based upon the specific identification method. Premiums and discounts are recognized in interest income using the interest method over the period to maturity.

Interest income from the investment securities portfolio is accrued as earned including the accretion of discounts and the amortization of premiums based on the original cost of each security owned. Discounts and premiums are accreted and amortized on a method that approximates the effective interest method to the maturity date of the security with the exception of the mortgage-backed securities. Discounts and premiums on mortgage-backed securities are accreted and amortized to the expected maturity date of the investment security. Realized gains or losses on the sale of investment and mortgage-backed securities are reported in the consolidated statement of income as of the trade date and determined using the amortized cost of the specific security sold.

Note 1 – Summary of Significant Accounting Policies (continued)

Prior to the adoption of ASC 326, management performed regular impairment analyses on the securities portfolio in accordance with FASB ASC Topic 320, *Investments-Debt and Equity Securities* (“ASC 320”) related to the consideration of impairment related to certain debt and equity securities. If it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the debt security not impaired at acquisition, an other-than-temporary impairment is considered to have occurred. When an other-than-temporary impairment (“OTTI”) occurs, the cost basis of the security is written down to its fair value (as the new cost basis) and the write-down is accounted for as a realized loss if it is credit related. In assessing whether impairment represents OTTI, the Company must consider whether it intends to sell a security or if it is likely that they would be required to sell the security before recovery of the amortized cost basis of the investment, which may be maturity. For debt securities, if the Company intends to sell the security or it is likely that a sale of the security may be required before recovering the cost basis, the entire impairment loss would be charged to results of operations as an OTTI. If the Company does not intend to sell the security and it is not likely the sale of the security is required by the Company, and the Company does not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be charged to results of operations. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows to be expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to other factors, the difference between the present value of the cash flows to be expected to be collected and fair value, is recognized as a charge to other comprehensive income (“OCI”).

Upon the adoption of ASC 326 on January 1, 2023, management no longer evaluates securities for OTTI, as ASC Subtopic 326-30, Financial Instruments - Credit Losses - Available for Sale Debt Securities, changes the accounting for recognizing impairment on available for sale and held to maturity debt securities. Each reporting period management evaluates impairment where there has been a decline in fair value below the amortized cost basis of a security to determine whether there is a credit loss associated with the decline in fair value. Management considers the nature of the collateral, potential future changes in collateral values, default rates, delinquency rates, third-party guarantees, credit ratings, interest rate changes since purchase, volatility of the security’s fair value and historical loss information for financial assets secured with similar collateral among other factors. Credit losses are calculated individually, rather than collectively, using a discounted cash flow method, whereby management compares the present value of expected cash flows with the amortized cost basis of the security. The credit loss component recognized through the provision for credit losses on the consolidated statements of income.

Note 1 – Summary of Significant Accounting Policies (continued)

For available-for-sale securities in an unrealized loss position, management first assesses whether it intends to sell, or is more likely than not to be required to sell, the security before recovery of its amortized cost basis. If either of the criteria regarding intent or requirement to sell is met, the security’s amortized cost basis is written down to fair value through income. For debt securities available-for-sale that do not meet the aforementioned criteria, the Company evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, management considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, limited by the amount that the fair value is less than the amortized cost basis.

Changes in the allowance for credit losses on securities available-for-sale are recorded as a provision for (or reversal of) credit loss expense. Losses are charged against the allowance when management believes the uncollectibility of a security available-for-sale is confirmed or when either of the criteria regarding intent or requirement to sell is met. Accrued interest receivable on available-for-sale debt securities is not included in the estimate of credit losses.

Loans – Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding unpaid principal balances reduced by any charge-offs or specific valuation amounts and net of any deferred fees or costs on originated loans or unamortized premiums or discounts on purchased loans. Interest income on loans is calculated by the simple-interest method on daily balances of the principal amount outstanding. Loan origination fees and origination costs are capitalized and recognized as an adjustment to yield over the life of the related loan using the effective interest method. The accrual of interest on loans is discontinued at the time the loan becomes ninety-days delinquent unless the credit is well secured and in process of collection. In some cases, loans can be placed on nonaccrual status or charged off at an earlier date if collection of principal or interest is considered doubtful. Subsequent collections of interest are applied to unpaid balances or included in interest income based upon management’s assessment of the likelihood that principal will be collected.

When loans are placed on nonaccrual status, all interest previously accrued but not collected is reversed against current period interest income. Income on nonaccrual loans is subsequently recognized only to the extent that cash is received and the loan’s principal balance is deemed collectible. Interest accruals are resumed on such loans only when they are brought current with respect to interest and principal and when, in the judgment of management, the loans are estimated to be fully collectible as to all principal and interest.

Note 1 – Summary of Significant Accounting Policies (continued)

Allowance for credit losses on loans – The Company accounts for credit losses on loans in accordance with ASC 326, which was effective for the Company on January 1, 2023. ASC 326 requires the Company to record an allowance for credit losses (“allowance” or “ACL”) on loans that represents an amount that is adequate to absorb the expected lifetime credit losses on loans at the time of origination or acquisition. The ACL is maintained at a level deemed appropriate by management to provide for expected credit losses in the portfolio as of the date of the consolidated statements of financial condition. Estimating expected credit losses requires management to use relevant available information, from internal and external sources, relating to past events, current conditions, historical loss experience, and reasonable and supportable forecasts. Determination of the adequacy of the allowance is inherently complex and requires the use of significant and highly subjective estimates.

The ACL on loans is a valuation account that is deducted from the loans’ amortized cost basis to present the net amount expected to be collected on the loans. Loans are charged off against the allowance when management believes the uncollectibility of a loan balance is confirmed and recoveries are credited to the allowance when received. In the case of recoveries, amounts may not exceed the aggregate of amounts previously charged off. Adjustments to the allowance are reported in our consolidated income statement as a component of the provision for credit losses.

Management has made the accounting policy election to exclude accrued interest receivable on loans from the estimate of credit losses for loans.

The Company has segmented the loan portfolio according to loans that share similar attributes and risk characteristics. Each segment possesses varying degrees of risk based on, among other things, the type of loan and collateral. These segment groupings are real estate loans, commercial loans, SBA loans, accounts receivable loans, advanced restaurant financing loans, consumers loans, and overdrafts. Within each segment grouping there are various classes of loans as described below. The Company determines the ACL for loans based on this more detailed loan segmentation and classification.

Real estate loans - Real estate loans are comprised of various types of loans for which the Company holds real property as collateral including commercial real estate ("CRE") loans, multi-family loans, and construction loans. We make commercial mortgage loans collateralized by owner-occupied and non-owner-occupied real estate, as well as multi-family residential loans. The primary risks of CRE loans include the borrower’s inability to pay, material decreases in the value of the collateralized real estate and significant increases in interest rates, which may make the real estate loan unprofitable. CRE loans may be more adversely affected by conditions in the real estate markets or in the general economy. Construction loans are considered to have higher risks due to construction completion and timing risk, the ultimate repayment being sensitive to interest rate changes, government regulation of real property and the availability of long-term financing. Additionally, economic conditions may impact the Company’s ability to recover its investment in construction loans, as adverse economic conditions may negatively impact the real estate market, which could affect the borrower’s ability to complete and sell the project. Additionally, the fair value of the underlying collateral may fluctuate as market conditions change.

Note 1 – Summary of Significant Accounting Policies (continued)

Commercial loans - Commercial loans are comprised of commercial and industrial (“C&I”) loans secured by business assets including inventory, receivables and machinery and equipment of businesses located generally in the Company’s primary market area. Loan types in this segment include revolving lines of credit, term loans, and loans secured by liquid collateral such as cash deposits. Risks associated with C&I loans arises primarily due to the difference between expected and actual cash flows of the borrowers. In addition, the recoverability of the Company’s investment in these loans is also dependent on other factors primarily dictated by the type of collateral securing these loans. The fair value of the collateral securing these loans may fluctuate as market conditions change. In the case of loans secured by accounts receivable, the recovery of the Company’s investment is dependent upon the borrower’s ability to collect amounts due from its customers.

Small Business Administration (“SBA”) loans – The Company originates certain C&I and CRE loans under the SBA’s 7(a) and 504(a) loan programs, in conformity with SBA underwriting and documentation standards. These loans contain additional credit enhancements provided by the SBA, and SBA 7(a) loans are guaranteed in part by the SBA. The risks inherent in this portfolio include increases in interest rates due to variable rate structures, generally lower levels of borrower equity or net worth, fluctuations in real estate values and changes in the local and national economy.

Accounts receivable loans – Accounts receivable (“AR”) loans are comprised of factored AR financing and AR formula revolving loans. These loans are secured by accounts receivable and business assets. Risks associated with AR loans arises primarily relate to the borrower’s ability to collect amounts due from its customers. The fair value of the collateral securing these loans may fluctuate as market conditions change.

Advanced restaurant financing loans – Advanced restaurant financing (“ARF”) loans are comprised of homogenous low dollar commercial loans to restaurants that the Company acquires a participating interest from the direct lender. ARF loans are secured by business assets including inventory and machinery and equipment. Risks associated with ARF loans arises primarily due to the difference between expected and actual cash flows of the borrowers. In addition, the recoverability of the Company’s investment in these loans is also dependent on other factors primarily dictated by the type of collateral securing these loans. The fair value of the collateral securing these loans may fluctuate as market conditions change.

Note 1 – Summary of Significant Accounting Policies (continued)

Consumer and other loans - The Company originates a limited number of consumer loans, generally for banking customers only, which consist primarily of home equity lines of credit and overdrafts. Repayment of these loans is dependent on the borrower's ability to pay and the fair value of the underlying collateral.

The ACL for the loan portfolio segments identified above, with the exception of ARF loans, are calculated using a historical loss rate methodology, which utilizes the Company's historical loss experience adjusted for future economic forecasts. The reasonable and supportable forecast period represents a one-year economic outlook for the applicable economic variables. Following the end of the reasonable and supportable forecast period expected losses revert back to the historical loss experience immediately. Economic variables that have the most significant impact on the allowance include unemployment rate and gross domestic product ("GDP"). Adjustments to historical loss experience are made for differences in the current loan-specific risk characteristics such as differences in lending policies and procedures including underwriting standards, concentration, nature and volume of the loan portfolio, or lending management/staff as well as for changes in environmental conditions, such as changes in economic conditions, collateral values, delinquency level or other relevant factors. Contractual loan level cash flows are adjusted for the Company's historical prepayment and curtailment rate experience.

Two smaller portfolios, ARF loans and a small pool of participated C&I loans, are evaluated using a simplified loss-rate method that calculates lifetime expected credit losses for the respective pools (simplified approach).

Loans that do not share risk characteristics are evaluated on an individual basis. Loans evaluated individually are not also included in the collective evaluation. When management determines foreclose is probable or when the borrower is experiencing financial difficulty at the reporting date and repayment is expected to be provided substantially through the operation or sale of the collateral expected credit losses are based on the fair value of the collateral at the reporting date, adjusted for selling costs.

When the discounted cash flow method is used to determine the allowance for credit losses, management does not adjust the effective interest rate used to discount expected cash flows to incorporate expected prepayments.

Contractual Term: Expected credit losses are estimated over the contractual term of loans, adjusted for expected prepayments when appropriate. The contractual term excludes expected extensions, renewals, and modifications unless either of the following applies: management has a reasonable expectation at the reporting date than an extension or renewal option are included in the original or modified contract at the reporting date and are not unconditionally cancellable by the Company.

Note 1 – Summary of Significant Accounting Policies (continued)

Allowance for credit losses on off-balance sheet credit exposures – The Company estimates expected credit losses over the contractual period in which the Company is exposed to credit risk via a contractual obligation to extend credit unless that obligation is unconditionally cancellable by the Company. The allowance for credit losses on off-balance sheet credit exposure is adjusted through a provision for credit loss expense. The estimate includes consideration of the likelihood that funding will occur and an estimate of expected credit losses on commitments expected to be funded over its estimated life. The estimate utilizes the same factors and assumptions as the allowance for credit losses on loans and is applied at the same collective segmentation and classification level.

Allowance for loan losses – Prior to the adoption of ASC 326 on January 1, 2023, the Company maintained an allowance for loan and leases losses ("ALLL") in accordance with ASC 310, Receivables and ASC 450, Contingencies, which represented an ALLL for individually evaluated loans that were identified as impaired, as well as estimated probable incurred losses inherent in the remainder of the loan portfolio as of the date of the consolidated statements of financial condition. A provision for loan losses is charged to results of operations in an amount sufficient to bring the ALLL to an estimated balance considered adequate. Loan losses are charged against the ALLL when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the ALLL.

Management determines the adequacy of the ALLL based upon management's periodic review of the collectability of the loans that considers historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. The evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. The allowance consists of specific, general, and unallocated components. The specific component relates to loans that are classified as impaired. The general component covers non-impaired loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

The Company utilizes qualitative factors adjustments to the allowance for loan loss analysis in order to systematically quantify the credit risk impact of other trends and changes within the loan portfolio. The qualitative factors consider the following nine factors, which are patterned after the guidelines provided under the Federal Financial Institutions Examination Council Interagency Policy Statement on the Allowance for Loan and Lease Losses issued in 2006:

Note 1 – Summary of Significant Accounting Policies (continued)

- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;
- Changes in international, national, regional, and local economic and business conditions and developments that affect the collectability of the portfolio, including the condition of various market segments;
- Changes in the nature and volume of the portfolio and in the terms of loans;
- Changes in the experience and ability of lending management and other relevant staff;
- Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans;
- Changes in the quality of the institution's loan review system;
- Changes in the value of underlying collateral for collateral-dependent loans;
- The existence and effect of any concentrations of credit and changes in the level of such concentrations; and
- The effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the institutions' existing portfolio.

A loan is considered impaired when it is probable that the Company will not be able to collect all principal and interest amounts due according to the loan's contractual terms based upon available information and events. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. The amount of the valuation allowance for impaired loans is determined by comparing the recorded investment in each loan with its value measured by one of three methods: (i) the estimated present value of total expected future cash flows, discounted at the loan's effective interest rate; (ii) the loan's observable market price, if available from a secondary market; or (iii) by the fair value of the underlying collateral if the loan is collateral dependent. If the measure of impairment for an impaired loan is less than the related recorded investment, the shortfall is charged-off or a specific valuation allowance (impairment allowance) is established as a component of the allowance for loan losses through a charge to the provision for loan losses. Subsequent permitted adjustments to the impairment allowance are made through a corresponding charge or credit to the provision for loan losses.

Prior to the adoption of ASC 326, loans were reported as TDRs when the Company grants concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concession include forgiveness of principal or accrued interest, extending the maturity date(s), or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, TDR loans are impaired as the Company will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment allowances on non-collateral dependent TDR loans are measured by comparing the present value of expected future cash flows on the TDR loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment allowances are recognized as a specific component to be provided for in the allowance for loan losses.

Note 1 – Summary of Significant Accounting Policies (continued)

The Coronavirus Aid, Relief and Economic Security ("CARES") Act, as amended by the Consolidated Appropriations Act, 2021 ("CAA"), permits financial institutions to suspend TDR classification requirements under U.S. GAAP for any COVID-19 pandemic-related loan modifications for borrowers who were less than 30 days past due as of December 31, 2019, that were executed after March 1, 2020, and earlier of (i) 60 days after the end of the COVID-19 national emergency declaration under the National Emergencies Act, or (ii) January 1, 2022. The Company implemented a short-term modification program to provide temporary payment relief from the economic impacts of the COVID-19 pandemic under the CARES Act, in the form of interest only payment deferrals or principal and interest payment deferrals, to borrowers who meet the program's qualifications. The Company is not adjusting the aging of loans for customers granted a payment deferral in response to the COVID-19 pandemic. These loans remain in the aging category that was applicable at the time of payment deferral and interest continues to accrue on these loans.

Loans held for sale – Loans held for sale are recorded at the lower of aggregate cost or estimated fair value. The fair value of loans held for sale is based primarily on prices that secondary markets are currently offering for loans with similar characteristics. Net unrealized losses, if any, are recognized through a valuation allowance through a charge to earnings. The carrying value of loans held for sale is net of premiums as well as deferred origination fees and costs. Premiums and net origination fees and costs are deferred and included in the basis of the loans in calculating gains and losses upon sale.

Loans that are originated with the intent to sell them in the secondary market are initially classified as loans held for sale. The Company may also periodically review loans held for investment for subsequent sale. Once a decision has been made to sell loans not previously classified as held for sale, such loans shall be transferred into the loans held for sale classification and measured at the lower of cost or fair value.

Servicing assets – The Company recognizes servicing assets when loans are sold with servicing retained. The Company initially recognizes and measures at fair value servicing assets obtained from the sale of loan as a component of the gain or loss on sale. Fair value is based on market prices for comparable servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The Company subsequently measures these servicing assets by using the fair value method to recognize servicing assets at fair value. Servicing assets are reported as a component of other assets on the consolidated statements of financial condition with changes in the fair value of servicing assets reported as a component of non-interest income on the consolidated statements of income.

Transfer of financial assets – Transfers of an entire financial asset, a group of entire financial assets, or a participating interest in an entire financial asset are accounted for as sales when control over the assets have been surrendered. Control over transferred assets is deemed to be surrendered when the assets have been isolated from the Company, the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Note 1 – Summary of Significant Accounting Policies (continued)

Premises and equipment – Premises and equipment are reported at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives, which typically range from three to seven years for furniture and equipment. Leasehold improvements are amortized over the shorter of the remaining lease term and the subsequent option period that is likely to be exercised or the estimated useful lives of the leasehold improvements.

Expenditures for betterments or major repairs are capitalized and those for ordinary repairs and maintenance are charged to results of operations as incurred. Gains and losses on dispositions are included in current results of operations.

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amounts of such assets may not be recoverable. If the sum of the expected future cash flows is less than the stated amount of the asset, an impairment loss is recognized for the difference between the fair value of the asset and its carrying amount.

Other real estate owned – Assets acquired in settlement of loans are recorded at fair value less estimated disposal costs. Any excess of the carrying amount of the loan over the fair value of the asset is charged against the allowance for loan losses at the time of transfer. Subsequent to the transfer, any losses on disposition or write-downs as a result of declines in market value of specific assets are charged against current results of operations. Real estate acquired through foreclosure sale, deed-in-lieu of foreclosure, and bank property for which banking use is no longer contemplated are classified as other real estate owned on the consolidated statements of financial condition. Operating income and expenses incurred on these properties are reflected in current earnings within non-interest expense. One other real estate owned property was sold for the year ended December 31, 2023. There were no other real estate owned properties acquired and none sold for the year ended December 31, 2022.

Bank Owned Life Insurance – The Company invests in Bank Owned Life Insurance (“BOLI”). BOLI involves the purchasing of life insurance by the Company on a chosen group of employees. The Company is the owner and beneficiary of these policies. BOLI is recorded as an asset at cash surrender value. Increases in the cash value of these policies, as well as insurance proceeds received, are recorded in other noninterest income and are not subject to income tax.

Note 1 – Summary of Significant Accounting Policies (continued)

Derivative financial instruments and hedging activities – The Company enters into derivative transactions principally to protect against the risk of adverse price or interest rate movements on the future cash flows of certain assets. FASB ASC Topic 815, *Derivatives and Hedging* (“ASC 815”), establishes accounting and reporting standards requiring that every derivative instrument be recorded in the consolidated statements of financial condition as either an asset or liability measured at its fair value. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and on the type of hedging relationship. On the date the derivative contract is entered into, the Company designates the derivative as a fair value hedge, a cash flow hedge, or a non-designated derivative. The Company’s derivative contract is designated as a cash flow hedge.

Cash flow hedges are accounted for by recording the changes in the fair value of the effective portion of the derivative instrument in other comprehensive income (loss) and are recognized in the consolidated statements of income when the hedged item affects earnings.

The Company formally documents the relationship between a derivative instrument and a hedged asset or liability, as well as its risk management objective and strategy for undertaking various hedge transactions.

The Company also formally assesses, both at the hedge’s inception and on an ongoing basis, whether the derivatives that are used in the hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

Income taxes – The Company accounts for income taxes in accordance with FASB ASC Topic 740, Income Taxes (“ASC 740”). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income. The Company determines deferred income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are established for the temporary differences between the financial reporting basis and the income tax basis of the Company’s assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled. Changes in enacted tax rates result in a revaluation of deferred tax assets and liabilities through the income tax provision in the period that the tax rate changes are enacted. A valuation allowance, if needed, reduces deferred assets to the amount expected to be realized.

Benefits from tax positions are recognized in the financial statements only when it is more-likely-than-not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. Interest and penalties associated with uncertain tax positions are recognized as components of other operating expenses in the consolidated statements of income. The Company did not recognize any uncertain tax positions at December 31, 2023 and 2022.

Note 1 – Summary of Significant Accounting Policies (continued)

Equity securities – Equity securities are carried at fair value with changes in fair value reported in earnings.

Restricted equity securities –The Bank is a member of the Federal Home Loan Bank ("FHLB") system. Members are required to own a certain amount of FHLB stock based on the level of borrowing and other factors. At December 31, 2023 and 2022, the Company held $2,669,000 and $2,021,000, respectively, of shares of FHLB stock, which is carried at cost and classified as restricted equity securities.

The Company also invests in the stock of Pacific Coast Bankers Bank ("PCBB") in connection with its correspondent banking arrangement with PCBB. PCBB stock is restricted as to purchase, sale, and redemption. At December 31, 2023 and 2022, the Company held $531,000 of PCBB stock, which is carried at cost and classified as restricted equity securities.

The Company evaluates restricted equity securities for impairment on a periodic basis. No impairment was recorded on restricted equity securities for the years ended December 31, 2023 and 2022.

Financial instruments – In the ordinary course of business, the Company has entered into off-balance sheet agreements consisting of commitments to extend credit, commercial letters of credit, and standby letters of credit. Such financial instruments are recorded in the financial statements when they are funded, or the related fees are incurred or received.

Share-based compensation – The Company accounts for stock option awards whereby the compensation cost relating to share-based payment transactions be recognized in the statements of income based upon the grant-date fair value of the stock options granted by the Company. The effect of stock-based accounting rules is to require entities to measure the cost of employee services received in exchange for stock options and to recognize the cost over the period the employee is required to provide services for the award. The fair value of stock options is measured using a Black-Scholes pricing model.

The Company's 2017 Stock Option and Restricted Stock Grant Plan provides for granting of restricted stock awards for the benefit of certain members of the board of directors, executives, and key employees of the Company and its affiliates. Restricted stock grants are subject to performance-based vesting as well as other approved vesting conditions. Compensation expense is recognized over the service period to the extent restricted stock units are expected to vest.

Advertising costs – Advertising costs of $334,000 and $289,000 for the years ended December 31, 2023 and 2022, respectively, were expensed as incurred.

Comprehensive income – Comprehensive income consists of net income and other comprehensive income (loss). Other comprehensive income (loss) consists of unrealized gains and losses on the Company's cash flow hedge and securities available-for-sale, which are also recognized as separate components of consolidated shareholders' equity.

Note 1 – Summary of Significant Accounting Policies (continued)

Common stock – The Company has authorized 10 million shares of common stock. Each share entitles the holder to one vote. There are no dividend or liquidation preferences, participation rights, call prices or dates, conversion prices or rates, sinking fund requirements, or unusual voting rights associated with these shares.

Preferred stock – The Company has authorized 10 million shares of preferred stock.

Earnings per common share ("EPS") – Earnings per common share amounts have been computed using the weighted average number of shares outstanding of common stock for the purposes of computing basic EPS. Basic EPS is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the period. Basic EPS excludes the dilutive effect that could occur if any securities or other contracts to issue common stock were exercised or converted into or resulted in the issuance of common stock. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options, result in the issuance of common stock which shares in the earnings available to common shareholders of the Company. The Company's restricted stock awards outstanding are not eligible to be issued or to receive dividends until fully vested. There were 20,335 and 38,101 restricted stock awards that vested during the years ended December 31, 2023 and 2022, respectively. There were no restricted stock awards issued during the year ended December 31, 2023 and 2,100 restricted stock awards issued during the year ended December 31, 2022. The treasury stock method is applied to determine the dilutive effect of stock options and restricted stock awards in computing dilutive earnings per share. Basic and diluted EPS is calculated as follows:

(In thousands, except per share data)	2023	2022
BASIC EARNINGS PER COMMON SHARE		
Net income	$ 7,357	$ 4,768
Weighted-average common shares outstanding	3,315	3,286
Earnings per common share – basic	$ 2.22	$ 1.45
DILUTED EARNINGS PER COMMON SHARE		
Net income	$ 7,357	$ 4,768
Weighted-average common shares outstanding	3,315	3,286
Dilutive effect of stock options and restricted stock awards	2	5

Note 1 – Summary of Significant Accounting Policies (continued)

Fair value measurements – FASB ASC 820, *Fair Value Measurements and Disclosures* ("ASC 820"), defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 establishes a three-level hierarchy for disclosure of assets and liabilities recorded at fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources, while unobservable inputs reflect the Company's estimates about market data. In general, fair values determined by Level 1 inputs utilize quoted prices for identical assets or liabilities traded in active markets that the Company has the ability to access. Fair values determined by Level 2 inputs utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Reclassification – Certain amounts from the prior year footnotes have been reclassified, in order to conform to the current year presentation. There was no impact on net income or retained earnings.

Note 2 – Investment Securities

The carrying amounts of securities and their estimated fair values at December 31, 2023 and 2022, were as follows:

	December 31, 2023				
(In thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Allowance for Credt Losses	Estimated Fair Value
Available-for-Sale					
Agency securities	$ 5,963	$ -	$ (692)	$ -	$ 5,271
Mortgage and asset-backed securities	43,252	50	(4,689)	-	38,613
Corporate bonds	7,723	-	(1,205)	-	6,518
U.S. Treasury	-	-	-	-	-
	$ 56,938	$ 50	$ (6,586)	$ -	$ 50,402

Note 2 – Investment Securities (continued)

	December 31, 2022			
(In thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

	$ 27,901	$ (1,830)	$ 26,212	$ (5,639)	$ 54,113	$ (7,469)

Note 2 – Investment Securities (continued)

As of December 31, 2023, the Company has sixty available-for-sale securities in an unrealized loss position. The Company had seventy-six available-for-sale securities in an unrealized loss position as of December 31, 2022. There were fifity-five available-for-sale securities in an unrealized loss position for twelve months or more as of December 31, 2023. There were twenty-nine available-for-sale securities in an unrealized loss position for twelve months or more as of December 31, 2022.

As of December 31, 2023, the majority of Company's available-for-sale investments are mortgage and asset-backed securities, corporate bonds, and agency securities. The Company does not intend to sell these securities, nor anticipates that these securities will be required to be sold before recovery. The unrealized losses are due to changes in market interest rates or widening of market spreads subsequent to the initial purchase of the securities. The fair value is expected to recover as the securities approach their maturity date or repricing date or if market yields for such securities decline. The Company does not believe any of these securities are impaired due to reasons of credit quality. If the Company assesses the need to sell a security due to a corporate's risk rating decline, the related losses are recognized in earnings. There was no allowance for credit losses on debt securities available-for-sale as of December 31, 2023.

The Company did not have any securities that were considered to be other than temporarily impaired as of December 31, 2022.

The amortized cost and estimated fair values of investment securities at December 31, 2023 and 2022, by contractual maturity, are shown below. Expected and actual maturities may differ from contractual maturities because issuers or borrowers may have the right to call or prepay obligations with or without prepayment penalties.

	December 31, 2023		December 31, 2022	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
(In thousands)				
Available-for-Sale				
Due in one year or less	$ -	$ -	$ 2,986	$ 2,963
Due from one to five years	3,985	3,522	5,160	4,823
Due in more than five years	52,953	46,880	53,902	46,796
	$ 56,938	$ 50,402	$ 62,048	$ 54,582

The Company realized sales proceeds of $8,006,000 and gross losses of $906,000 related to the sale of available-for-sale securities in the year ended December 31, 2023. There were no sales of available-for-sale securities in the year ended December 31, 2022.

Note 3 – Loans and Allowance for Credit Losses

Our disclosures below reflect these changes made in 2023 to conform with the adoption of ASC 326, using the modified retrospective approach. Accordingly, prior period was not modified to conform to the current period presentation.

The composition of the Company's loan portfolio at December 31, 2023 and 2022, was as follows:

	2023	2022
(In thousands)		
Real estate loans	$ 265,040	$ 234,966
Commercial loans	89,034	67,723
Consumer loans	802	1,064
SBA loans	113,505	102,542
Accounts receivable loans	39,453	22,983
Advanced restaurant financing loans	10,429	8,034
Overdrafts	725	88
Gross loans	518,988	437,400
Less		
Deferred loan fees (costs), net	(1,934)	(1,668)
Discount on retained loans	2,689	2,359
Allowance for loan losses	7,215	5,909
Loans, net	$ 511,018	$ 430,800

Note 3 – Loans and Allowance for Credit Losses (continued)

The following tables present the activity in the allowance for credit losses by loan portfolio segment for the year ended December 31, 2023 and 2022.

	Allowance for Credit Losses As of and For the Year Ended December 31, 2023					
	Beginning Balance Prior to Adoption of ASC 326	Impact of Adopting ASC 326	Provision (Recapture) for Credit Losses Charged to Expense	Charge-offs	Recoveries on Loans Previously Charged-off	Ending Balance
(In thousands)

Note 3 – Loans and Allowances for Credit Losses (continued)

Management believes that the allowance for credit losses was adequate as of December 31, 2023. There is, however, no assurance that future loan losses will not exceed the levels provided for in the allowance for credit losses and could possibly result in additional charges to the provision for credit losses.

As of December 31, 2023, loans evaluated on an individual basis was comprised of $1,380,000 in commercial loans with corresponding allowance for credit losses of $400,000 and $333,000 in SBA loans with corresponding allowance for credit losses of $240,000.

The following presents by loan type the balance and activity for the allowance for loan losses disaggregated on the basis of the Company's impairment measurement method and the related recorded investment in loans and leases as of and for the year ended December 31, 2022. Recorded investment in loans is defined as the unpaid principal balance, adjusted for deferred fees/costs, premiums, discounts, accrued interest, and may also reflect a previous write-down of the investment. However, for reporting purposes, recorded investments for the Company approximate unpaid principal balance as the other components are not deemed material.

	Recorded Investment in Loans As of December 31, 2022		
	Ending Balance Individually Evaluated for Impairment	Ending Balance Collectively Evaluated for Impairment	Ending Balance
(In thousands)			
Real estate	$ 355	$ 234,611	$ 234,966
Commercial	219	67,504	67,723
Consumer	-	1,064	1,064
SBA	-	102,542	102,542
Accounts receivable	-	22,983	22,983
Advance restaurant financing	-	8,034	8,034
Overdrafts	-	88	88
Total	$ 574	$ 436,826	$ 437,400

Note 3 – Loans and Allowance for Credit Losses (continued)

The Company uses several credit quality indicators to manage credit risk in an ongoing manner by assigning a risk rating to each loan upon loan origination and is periodically reassessed and validated during the term of the loan through the Company's credit review processes. The Company's primary credit quality indicators are to use an internal credit risk rating system that categorizes loans and leases into pass, special mention, or classified categories. Credit risk ratings are applied individually to all loans that have significant or unique credit characteristics that benefit from a case-by-case evaluation. The following are the definitions of the Company's credit quality indicators:

- Pass/watch: Loans in all classes that comprise the commercial and consumer portfolio segments that are not adversely rated, are contractually current as to principal and interest, and are otherwise in compliance with the contractual terms of the loan or lease agreement. Management believes that there is a low likelihood of loss related to those loans that are considered pass.

- Special mention: Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Company's credit position at some future date.

- Substandard: Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the repayment of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

- Doubtful/loss: Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or repayment in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work towards strengthening of the asset, classification as a loss (and immediate charge-off) is deferred until more exact status may be determined. In certain circumstances, a doubtful rating will be temporary, while the Company is awaiting an updated collateral valuation. In these cases, once the collateral is valued and appropriate margin applied, the remaining un-collateralized portion will be charged off. The remaining balance, properly margined, may then be upgraded to substandard; however, it must remain on nonaccrual. A loss rating is assigned to loans considered un-collectible and of such little value that the continuance as an active Company asset is not warranted. This rating does not mean that the loan has no recovery or salvage value, but rather that the loan should be charged off now, even though partial or full recovery may be possible in the future.

Note 3 – Loans and Allowance for Credit Losses (continued)

Real estate	$ 355	$ 355	$ -	$ 448	$ 18
Commercial	219	219	-	194	26
SBA	-	-	-	205	-

Loan modifications – The Company offers modifications to borrowers on an infrequent basis. The modification categories offered can include rate modification, term modification, interest only modification, payment modification, or a combination of modifications. The Company may agree to modify the contractual terms of a loan to a borrower experiencing financial difficulties as part of ongoing loss mitigation strategies. These modifications may result in principal forgiveness, other-than-significant payment delay, term extension, interest rate modification, or combination therein.

The Company did not grant any payment deferrals and there were no newly modified loans to borrowers experiencing financial difficulties in the year ended December 31, 2023.

There were no newly restructured loans that met the definition of a TDR in the year ended December 31, 2022. As of December 31, 2022, there was one TDR in the amount of $355,000 with no allocated allowance included within the impaired loan balance.

The Company did not grant any payment deferrals in the year ended December 31, 2022. As of December 31, 2022, the Company had 53 loans with an aggregate loan balance of $36,955,000 that were granted payment deferral in response to the COVID-19 pandemic and were excluded from TDR classification as permitted under the CARES Act and guidance from federal banking regulators.

Note 4 – Premises and Equipment

Premises and equipment as of December 31, 2023 and 2022, are summarized as follows:

(In thousands)	2023	2022
Building improvements	$ 899	$ 1,193
Furniture, fixtures, and equipment	2,220	2,658
	3,119	3,851
Less: accumulated depreciation and amortization	(2,838)	(3,489)
	$ 281	$ 362

Depreciation and amortization expense for the years ended December 31, 2023 and 2022, amounted to $162,000 and $180,000, respectively.

Note 5 – Servicing Assets

Activity for servicing assets and the related changes in fair value for the years ended December 31, 2023 and 2022, is as follows:

(In thousands)	2023	2022
Beginning balance	$ 2,120	$ 1,269
Additions, net	903	1,495
Change in fair value of servicing assets	(542)	(644)
Ending balance	$ 2,481	$ 2,120

Loans serviced for others, consisting solely of SBA loans, are not included in the consolidated statements of financial condition. The unpaid principal balances of these loans serviced for others were $156,905,000 and $134,436,000 as of December 31, 2023 and 2022, respectively. Loan servicing fees totaled $1,401,000 and $1,029,000 for the years ended December 31, 2023 and 2022, respectively.

Note 6 – Deposits

At December 31, 2023, the scheduled maturities of time deposits are as follows:

	Time Deposits $250,000 and Under	Time Deposits Over $250,000
(In thousands)		
Matures During Years Ending December 31,		
2024	$ 101,834	$ 41,377
2025	337	-
2026	76	-
2027	46	-
2028	3	-
	$ 102,296	$ 41,377

Note 7 – Notes Payable and Other Borrowings

On August 1, 2017, the Company entered into an unsecured note agreement for $8,586,000 with a maturity date of August 14, 2022, and bears interest at a rate of 5.23%. On January 15, 2021, the Company refinanced the $8,586,000 unsecured note agreement by entering into an Amended and Restated Loan Agreement for a $10,000,000 revolving loan. The $10,000,000 revolving loan under the Amended and Restated Loan Agreement bears interest at a rate of Prime Rate plus 1.00% with a floor rate of 4.50% and has a maturity date of January 15, 2023 plus two one-year renewal options, which were exercised by the Company extending the maturity date to January 12, 2025. At December 31, 2023, the outstanding balance on the revolving loan was $1,650,000, and interest paid was $198,000 for the year ended December 31, 2023. At December 31 2022, the outstanding balance on the revolving loan was $1,450,000, and interest paid was $113,000 for the year ended December 31, 2022.

The FHLB provides the Company with financing availability, which is secured by pledged loans. FHLB borrowings may include overnight advances as well as advances with terms of up to 30 years. The Company had $97,820,000 and $100,133,000 of borrowing capacity from the FHLB at December 31, 2023 and 2022, respectively, based upon loans available to be pledged. The carrying value of loans pledged to the FHLB as collateral was $379,557,000 and $300,739,000 at December 31, 2023 and 2022, respectively.

Note 7 – Notes Payable and Other Borrowings (continued)

FHLB borrowings outstanding as of December 31, 2023 and 2022 are as follows:

December 31, 2023		
Maturity Date	Interest Rate	Balance Outstanding
(In thousands)		
May 6, 2024	4.72%	$ 2,500,000
June 28, 2024	5.45%	7,500,000
January 2, 2024	5.70%	45,000,000
		$ 55,000,000

December 31, 2022		
Maturity Date	Interest Rate	Balance Outstanding
(In thousands)		
January 3, 2023	4.65%	$ 10,000,000
January 30, 2023	4.63%	5,000,000
March 30, 2023	4.86%	5,000,000
December 29, 2023	5.11%	5,000,000
		$ 25,000,000

The Company had $731,000 and $879,000 of borrowing capacity from the Federal Reserve Bank of San Francisco ("FRB") as of December 31, 2023 and 2022, respectively, based upon loans available to be pledged. The carrying balance of loans pledged to the FRB as collateral was $883,000 and $1,148,000 as of December 31, 2023 and 2022, respectively. There were no borrowings outstanding as of December 31, 2023 and 2022.

The Company has unsecured revolving lines of credit with PCBB and Zions Bank providing for federal fund purchases up to $20,000,000 and $11,000,000, respectively. Borrowings are payable on demand and interest on outstanding borrowings accrues at rates negotiated at the time of the borrowing. As of December 31, 2023 and 2022, the Company did not have any borrowings outstanding against these lines of credits.

Note 8 – Junior Subordinated Deferrable Interest Debentures

The Mission Valley Statutory Trust I (the "Trust") was formed by the Company for the sole purpose of issuing trust preferred securities fully and unconditionally guaranteed by the Company. For financial reporting purposes, the Trust is not consolidated and the fixed rate junior subordinated deferrable interest debentures held by the Trust, issued and guaranteed by the Company, are reflected in borrowings within the Company's consolidated statements of financial condition.

On September 16, 2005, the Trust issued $6,000,000 fixed rate Capital Trust Pass-Through Securities ("TRUPS") with a liquidation value of $1,000 per security for gross proceeds of $6,000,000. The entire proceeds of the issuance were invested by the Trust in $6,186,000 of junior subordinated deferrable interest debentures issued by the Company with identical maturity, repricing, and payment terms as the TRUPS. These debentures represent the sole assets of the Trust and mature on December 15, 2035, with interest rate of 5.97% through September 15, 2010, variable interest rate equal to 3-month LIBOR plus 1.50% from September 15, 2010 through September 15, 2023, and variable interest rate equal to 3-month CME Term SOFR with 0.26161% tenor spread adjustment plus 1.50% from September 15, 2023 through maturity. Interest payments are due on a quarterly basis. The interest is deferrable at the Company's option for a period of up to twenty consecutive quarterly periods, but not beyond September 16, 2035 in any event.

Note 9 – Derivative Instrument and Hedge Activity

The Company uses derivative instruments, such as interest rate swap agreements, to manage its exposure to interest rate risks. All derivatives are recorded at fair value with the derivative asset and liability fair values included in other assets and accrued interest payable and other liabilities in the consolidated balance sheet.

The Company has one interest rate swap with notional amount of $6,000,000 as of December 31, 2023 and 2022, respectively, that was designated as a cash flow hedge of the TRUPS and were determined to be effective during all periods presented. The Company expects the cash flow hedge to remain effective during the remaining term of the interest rate swap.

The following table presents the notional amounts and fair values of the Company's derivatives as of December 31, 2023 and 2022.

	December 31, 2023			December 31, 2022		
		Fair Value			Fair Value	
	Notional Amount	Assets	Liabilities	Notional Amount	Assets	Liabilities
(In thousands)						
Derivatives designated as hedging instruments:						
Cash flow hedges:						
Interest rate swaps related to TRUPS	$ 6,000	$ 264	$ -	$ 6,000	$ 306	$ -

The Company did not recognize any ineffectiveness on the cash flow hedge for the years ended December 31, 2023 and 2022, respectively.

Note 10 – Income Taxes

The provision for income taxes for years ended December 31, 2023 and 2022, consisted of the following:

	2023	2022
(In thousands)		
Current		
Federal	$ 2,396	$ 1,632
State	1,265	907
	3,661	2,539
Deferred		
Federal	(588)	(484)
State	(196)	(171)
	(784)	(655)
	$ 2,877	$ 1,884

A reconciliation of the Company's effective tax rate with the statutory federal income tax rate for years ended December 31, 2023 and 2022, is as follows:

	2023		2022	
(In thousands)				
Statutory federal income tax rate	$ 2,149	21.0 %	$ 1,397	21.0 %
State franchise tax, net of federal benefit	876	8.6	570	8.6
Stock compensation	33	0.3	45	0.7
BOLI	(93)	(0.9)	(88)	(0.1)
Tax exempt interest	(4)	-	(4)	(1.3)
Other	(84)	(0.8)	(36)	(0.5)
	$ 2,877	28.2 %	$ 1,884	28.4 %

Note 10 – Income Taxes (continued)

The following is a summary of the components of the net deferred tax asset at December 31, 2023 and 2022:

(In thousands)	2023	2022
Deferred tax assets		
Allowance for credit losses	$ 1,994	$ 1,542
Lease liability	1,589	333
State tax	266	191
Net unrealized loss on interest rate swap and investment securities	1,855	2,117
Deferred compensation	1,445	1,316
Other, net	387	237
Total deferred tax assets	7,536	5,736
Deferred tax liabilities		
Loan origination costs	(1,042)	(876)
Right of use asset	(1,474)	(312)
Depreciation and amortization	(8)	(42)
Certain prepaid assets	(124)	(140)
Total deferred tax liabilities	(2,648)	(1,370)
Net deferred tax asset	$ 4,888	$ 4,366

Management believes, based upon the Company's historical performance and future projections, it is more-likely-than-not the deferred tax asset will be realized in the normal course of operations and has determined that no valuation allowance is necessary as of December 31, 2023 and 2022, respectively.

There were no interest and penalties accrued for the years ended December 31, 2023 and 2022, respectively. The Company files income tax returns in the U.S. federal jurisdiction and in California.

Note 11 – Employee Benefit Plans

The Company has established a 401(k) Plan for the benefit of eligible employees, whereby each employee being at least twenty-one years of age may become a participant at specified intervals. Employees may contribute up to 50% of their annual compensation to the 401(k) Plan each year subject to certain limits based on federal tax laws. The Company may elect to make some level of matching contributions to the plan at the discretion of the Board of Directors. Matching contributions of $459,000 and $363,000 were made for the years ended December 31, 2023 and 2022, respectively.

The Company sponsors a supplemental executive retirement plan ("SERP"), which is a nonqualified unfunded pension plan covering a select group of executives. The plan provides a retirement benefit payable in the form of a life annuity to the participants, which is based on a specified dollar amount as stated in the agreements. The accrued postretirement benefit balance was $2,866,000 and $2,795,000 at December 31, 2023 and 2022, respectively, and is reported in accrued interest payable and other liabilities within the consolidated statements of financial condition. The postretirement benefit expense reported within salaries, wages, and employee benefits in the consolidated statements of income was $230,000 and $173,000 for the years ended December 31, 2023 and 2022, respectively.

Note 12 – Share-Based Compensation

The Company approved the 2017 Omnibus Stock Equity Plan (the "Plan"), voted into effect by the majority of shares represented at its May 23, 2017 Annual Shareholders' Meeting and set to expire March 28, 2027. Under the Plan, directors and key employees receive long-term incentives ("Awards") in the form of incentive and nonqualified stock options and restricted stock. The Plan is administered by the Board of Directors, or a committee to be appointed by the Board, who will select the directors and key executives to receive options or Awards, the form of those Awards, the number of shares or dollar targets, and all terms and conditions. The Plan provides for terms with respect to accelerated vesting should a change in control occur.

Stock options expire no later than ten years from the date of grant. Stock options granted to an optionee who owns stock representing more than 10% of the voting power of all classes of stock of the Company shall expire not more than five years from the date of grant.

Note 12 – Share-Based Compensation (continued)

	December 31, 2023		December 31, 2022	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding at beginning of year	187,907	$ 14.43	153,445	$ 14.26
Exercised	-	-	-	-
Granted	-	-	47,250	15.07
Expired or forfeited	(51,953)	14.35	(12,788)	14.72
Outstanding at end of year	135,954	$ 14.46	187,907	$ 14.43
Options exercisable	83,114	$ 14.44	105,229	$ 14.38
Weighted-average remaining contractual life of options outstanding	5.5 years		6.5 years	

No stock options were exercised during 2023 and 2022. As of December 31, 2023, there was $157,000 of total unrecognized compensation cost related to nonvested stock options granted under the Plan. The cost is expected to be recognized over a weighted-average remaining period of 2.6 years. Compensation cost associated with the fair value of stock options that vested in 2023 and 2022 was $125,000 and $152,000, respectively. At December 31, 2023, the aggregate intrinsic value of options exercisable plus options expected to vest in future years is $0, based on a stock price of $13.75.

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option-pricing model using the assumptions shown in the following table. The expected volatility was based on the volatility of the Company's stock price over a period commensurate with the expected term of the option. The Company uses historical data on option exercises to determine the expected term within the valuation model.

	2023	2022
Risk free interest rate	Not applicable	1.65%-3.76%
Weighted-average expected life	Not applicable	6.75 years
Volatility	Not applicable	25.3%-32.1%
Dividends	Not applicable	None

There were no options granted during the year ended December 31, 2023.

Note 12 – Share-Based Compensation (continued)

The maximum number of shares available for all Awards under the 2017 Plan is up to 600,000 shares of the Bank's common stock. No more than 250,000 shares may be issued pursuant to Awards of restricted stock, and no more than 500,000 shares may be issued pursuant to Awards of incentive stock options, provided, however, that in no event may the total of all the restricted stock awards ("RSA"), incentive stock options, and nonqualified stock options granted under the 2018 Plan exceed 600,000. Restricted stock awards are ineligible to received stock dividends during the period in which they are unvested. At December 31, 2023, there were 131,000 shares of restricted stock awards available for future grant. At December 31, 2023, there were 214,000 shares of incentive stock options and nonqualified stock options available for future grant.

The following table presents a summary of RSA activity for 2023 and 2022:

	December 31, 2023		December 31, 2022	
	RSA	Weighted-Average Grant-Date Fair Value	RSA	Weighted-Average Grant-Date Fair Value
Nonvested at beginning of year	43,996	$ 15.00	79,997	$ 14.86
Granted	-	-	2,100	15.10
Vested	(20,335)	15.00	(38,101)	14.63
Forfeited	(6,333)	15.00	-	-
Nonvested at end of year	17,328	$ 15.00	43,996	$ 15.00

Compensation expense related to the grant of restricted stock for the years ended December 31, 2023 and 2022, totaled $292,000 and $460,000, respectively. Restricted stock awards are ineligible to receive stock dividends during the period in which they are unvested. As of December 31, 2023, there was $152,000 of total unrecognized compensation cost related to nonvested restricted stock awards granted under the Plan. The cost is expected to be recognized over a weighted-average remaining period of 0.65 years.

Note 13 – Leases

The operating lease right-of-use asset represents the right to use an underlying asset during the lease term. Operating lease liabilities represent the Company's obligation to make lease payments arising from the lease. Operating lease right-of-use assets and operating lease liabilities are recognized based on the present value of the remaining lease payments using a discount rate that represents the Company's incremental borrowing rate at the date of implementation of the new accounting standard or lease commencement date for leases executed after the adoption of the new accounting standard. Short-term leases (initial term of less than 12 months) are not recorded on the consolidated statements of financial condition and lease expense is recognized on a straight-line basis over the lease term. The Company has no material finance leases. The Company currently has operating leases for its administrative offices and branches.

Operating lease right-of-use assets were $4,985,000 and $1,056,000 as of December 31, 2023 and 2022, respectively, and are recorded in other assets in the consolidated statements of financial condition. Operating lease liabilities were $5,375,000 and $1,125,000 as of December 31, 2023 and 2022, respectively, and are recorded in other liabilities in the consolidated statements of financial condition. The Company recorded lease expense of $729,000 and $458,000 for the years ended December 31, 2023 and 2022, respectively.

Additional information regarding operating leases is summarized below for the year ended December 31:

(Dollars in thousands)	2023	2022
Cash paid for amounts included in the measurement of lease liabilities for operating leases	$ 381	$ 448
ROU assets obtained in exchange for lease liabilities	4,985	1,056
Weighted-average remaining lease term in months	124	73
Weighted-average discount rate	3.29%	1.69%

Note 13 – Leases (continued)

The following table shows future minimum payments under operating leases with terms in excess of one year as of December 31, 2023:

Years Ending December 31 *(in thousands),*	
2024	$ 601
2025	549
2026	566
2027	583
2028	600
Thereafter	3,528
Total undiscounted lease payments	6,427
Less: interest	(1,052)
Present value of lease liabilities	$ 5,375

Note 14 – Commitments and Contingencies

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized on the statements of financial condition. To mitigate this risk posed by these off-balance-sheet exposures, the Company has established an allowance for credit losses on off-balance-sheet exposures totaling $74,000 and $9,000 as of December 31, 2023 and 2022, respectively, which is included in accrued interest payable and other liabilities on the consolidated statements of financial condition.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are preliminarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. All standby letters of credit issued by the Company expire within one year of issuance.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation.

Note 14 – Commitments and Contingencies (continued)

Collateral held varies but may include receivables, inventory, property, plant, and equipment, residential properties, and income-producing commercial properties.

A summary of the contractual or notional amounts of the Company's significant off-balance-sheet financial instruments as of December 31, 2023 and 2022, is as follows:

(In thousands)	2023	2022
Commitments to extend credit	$ 55,524	$ 48,743
Standby letters of credit	150	150
	$ 55,674	$ 48,893

Litigation – In the ordinary course of business, the Company becomes involved in litigation. Management believes, based upon opinions of legal counsel, that the disposition of all suits pending against the Company will not have a material adverse effect on its financial position or results of operations.

Note 15 – Transactions with Related Parties

In the ordinary course of business, the Company enters into transactions with certain directors, officers, and shareholders, and certain affiliates of the Company.

As part of its normal banking activities, the Company has extended credit to and received deposits from certain members of its Board of Directors, major shareholders, and officers, as well as entities with which these individuals are associated. These related parties had deposits at the Company totaling approximately $4,896,000 and $10,251,000 at December 31, 2023 and 2022, respectively. There was one related-party loan in the amount of $586,000 and $609,000 at December 31, 2023 and 2022, respectively. Management believes these transactions were made in the ordinary course of business on substantially the same terms and conditions, including interest rates and collateral requirements, as comparable loans and deposits with other customers, and the loans did not involve more than normal credit risk or present other unfavorable features.

Note 16 – Fair Value of Financial Instruments

Fair value measurements within the ASC defines fair value, establishes a framework for measuring fair value under U.S. GAAP, and expands disclosures about fair value measurement. Fair value measurements apply to all financial assets and liabilities that are being measured and reported at fair value on a recurring and non-recurring basis.

Note 16 – Fair Value of Financial Instruments (continued)

The fair value of a financial instrument is the amount at which the asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the entire holdings of a particular financial instrument. Because no market value exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature, involve uncertainties and matters of judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

A three-level hierarchy is used for disclosure of assets and liabilities recorded at fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources, while unobservable inputs reflect the Company's estimates about market data.

In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) for identical instruments that are highly liquid, observable, and actively traded in over-the-counter markets. Fair values determined by Level 2 inputs utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations whose inputs are observable and can be corroborated by market data. Level 3 inputs are unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Note 16 – Fair Value of Financial Instruments (continued)

The following tables present information about the Company's assets and liabilities measured at fair value on a recurring and nonrecurring basis as of December 31, 2023 and 2022, and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) for identical instruments that are highly liquid, observable, and actively traded in over-the-counter markets.

	December 31, 2023			
	Total	Level 1	Level 2	Level 3
(In thousands)

Note 16 – Fair Value of Financial Instruments (continued)

The following table presents additional information about the unobservable inputs used in the fair value measurements on a recurring basis that were categorized within Level 3 of the fair value hierarchy as of December 31, 2023:

Financial Instrument	Valuation Technique	Unobservable Inputs	Range of Inputs	Weighted Average Input	Impact to Valuation from an Increased or Higher Input Value
Servicing assets	Discounted cash flow	Prepayment speeds	9.76%–28.9%	18.65%	Increase
		Discount rate	8.59%–46.4%	13.27%	Decrease
		Expected weighted average life on loan	1.1–5.48 years	3.73 years	Decrease

Securities available-for-sale – The table above presents the balance of securities available-for-sale, which is measured at fair value on a recurring basis. An independent third party performs market valuations of the Company's securities available-for-sale. The fair values are determined by using several sources for valuing securities. The techniques include pricing models that vary based on the type of asset being valued and incorporate available trade, bid, and other market information. Market valuation sources include observable market inputs and are therefore considered Level 2 inputs for purposes of determining the fair values.

Servicing assets – Fair value is based on a loan-by-loan basis, taking into consideration the original term to maturity, the current age of the loan, and the remaining term to maturity. The valuation methodology utilized for the servicing assets begins with generating future cash flows for each servicing asset, based on their unique characteristics and market-based assumptions for prepayment speeds. The present value of the future cash flows is then calculated utilizing market-based discount rate assumptions.

Derivative instruments – Interest rate swaps are valued by a third party, using models that primarily use market observable inputs, such as yield curves, and are validated by comparison with valuations provided by the respective counterparties. Derivative financial instruments are included in other assets and other liabilities in the consolidated statements of financial condition.

Individually evaluated loans and other real estate owned – The loan balance shown in the table above represents all of the Company's individually evaluated loans recognized as of December 31, 2023 and impaired loans recognized as of December 31, 2022. These loans are measured at fair value on a non-recurring basis. Loans that are collateral-dependent are measured based on the fair value of their collateral while non-collateral-dependent loans are measured on a discounted cash flow basis. The fair value of each loan's collateral is generally based on estimated market prices from an independently prepared appraisal, which is then adjusted for the cost related to liquidating such collateral. The estimated fair value of other real estate owned is based on the appraised values or other information for the estimated fair values of such assets. The Company generally uses an 8–10% discount for selling costs which is applied to all properties, regardless of size. Appraised values may be adjusted to reflect changes in market conditions that have occurred subsequent to the appraisal date or for revised estimates regarding the timing or cost of the property sale. These adjustments are based on qualitative judgments made by management on a case-by-case basis. There have been no significant changes in the valuation techniques during the period ended December 31, 2023.

Note 16 – Fair Value of Financial Instruments (continued)

The following tables present information about the level in the fair value hierarchy for the Company's assets and liabilities that are not measured at fair value as of December 31, 2023 and 2022.

Transfers between levels of the fair value hierarchy are recognized on the actual date of the events or circumstances that caused the transfer, which generally corresponds to the Company's quarterly valuation process. During the years ended December 31, 2023 and 2022, there were no transfers between levels of the fair value hierarchy.

	December 31, 2023

Note 17 – Regulatory Matters

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory—and possibly additional discretionary—actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines, the Company and the Bank must meet specific capital adequacy guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of Tier 1 capital (as defined in the regulations) to total average assets (as defined) and minimum ratios of Tier 1, common equity Tier 1 and total capital (as defined) to risk-weighted assets (as defined). Management believes, as of December 31, 2023 and 2022, that the Company and the Bank meet all capital requirements to which they are subject.

The Bank has been notified by its regulator that, as of its most recent regulatory examination, the Bank is regarded as "well capitalized" under the regulatory framework for prompt corrective action. Such determination has been made based on the Bank's Tier 1, common equity Tier 1, total capital, and leverage ratios. There have been no conditions or events since this notification that management believes would change the Bank's categorization as well capitalized under the ratios listed below.

The Company's and the Bank's actual and required capital amounts and ratios are (dollars in thousands):

Mission Valley Bancorp			Amount of Capital Required			
	Actual		Minimum Capital Requirement		Minimum to Be Well-Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in thousands)						
As of December 31, 2023						
Total capital ratio	$ 70,619	12.28%	$ 60,395	10.50%	$ 57,520	10.00%
Tier 1 capital ratio	63,428	11.03%	48,892	8.50%	46,016	8.00%
Tier 1 leverage ratio	63,428	10.33%	30,686	5.00%	30,686	5.00%
Common equity Tier 1 capital ratio	57,428	9.98%	40,264	7.00%	37,388	6.50%
As of December 31, 2022						
Total capital ratio	$ 62,376	13.02%	$ 50,303	10.50%	$ 47,908	10.00%
Tier 1 capital ratio	56,457	11.78%	40,721	8.50%	38,326	8.00%

Common equity Tier 1 capital ratio	57,256	11.95%	33,537	7.00%	31,142	6.50%

The Bank was required to establish and phase-in a "conservation buffer," consisting of a common equity Tier 1 capital amount equal to 2.5% of risk-weighted assets by 2019. As of December 31, 2022, the "conservation buffer" amount was 2.50% and fully phased-in. An institution that does not meet the conservation buffer requirement will be subject to restrictions on certain activities including payment of dividends, stock repurchases, and discretionary bonuses to executive officers.

The difference in common equity Tier 1 capital ratio between Mission Valley Bancorp and Mission Valley Bank is due to the TRUPS disclosed in Note 8.

Note 18 – Revenue from Contracts with Customers

All of the Company's revenue from contracts with customers in the scope of ASC 606 is recognized in non-interest income. Gains/losses on the sale of other real estate owned are included in non-interest expense and are generally recognized when the performance obligation is completed. This is typically at delivery of control over the property to the buyer at time of each real estate closing.

Note 18 – Revenue from Contracts with Customers (continued)

The following table presents the Company's sources of non-interest income for the twelve months ended December 31:

(In thousands)	2023	2022
Non-interest income		
Service charges and other income	$ 1,503	$ 1,531
Gain (loss) on sale of loans [(a)]	2,567	3,993
Loan servicing fees [(a)]	1,401	1,029
Net merchant income	769	796
Increase in cash surrender value of bank owned life insurance [(a)]	315	298
Gain on sale of OREO	35	-
Grant income [(a)]	5,395	171
Change in fair value of servicing assets [(a)]	(542)	(644)
Loss on sale of securities available-for-sale [(a)]	(906)	-
Other income	1,812	1,228
Total non-interest income	$ 12,349	$ 8,402

(a) Not within the scope of ASC 606.

Deposit service charges – The Company earns fees from its deposit customers for account maintenance, transaction-based activity, and overdraft services. Account maintenance fees consist primarily of account fees and analyzed account fees charged on deposit accounts on a monthly basis. The performance obligation is satisfied, and the fees are recognized on a monthly basis as the service period is completed. Transaction-based fees on deposit accounts are charged to deposit customers for specific services provided to the customer, such as non-sufficient funds fees, overdraft fees, and wire fees. The performance obligation is completed as the transaction occurs and the fees are recognized at the time each specific service is provided to the customer.

Debit and ATM interchange fee income and expenses – Debit and ATM interchange income represents fees earned when a debit card issued by the Company is used. The Company earns interchange fees from debit cardholder transactions through the Visa payment network. Interchange fees from cardholder transactions represent a percentage of the underlying transaction value and are recognized daily, concurrently with the transaction processing services provided to the cardholder. The performance obligation is satisfied, and the fees are earned when the cost of the transaction is charged to the cardholders' debit card. Certain expenses directly associated with the credit and debit card are recorded on a net basis with the interchange income.

Credit card and interchange income and expenses – Credit card interchange income represents fees earned when a credit card issued by the Company is used. Similar to the debit card interchange, the Company earns an interchange fee for each transaction made with the Company's branded credit cards. The performance obligation is satisfied, and the fees are earned when the cost of the transaction is charged to the cardholders' credit card. Certain expenses and rebates directly related to the credit card interchange contract are recorded net to the interchange income.

Note 18 – Revenue from Contracts with Customers (continued)

Merchant fee income – Merchant fee income represents fees earned by the Company for card payment services provided to its merchant customers. The Company has a contract with a third party to provide card payment services to merchants that contract for those services. The third-party provider passes the payments made by the merchants through to the Company. The Company, in turn, pays the third-party provider for the services it provides to the merchants. These payments to the third-party provider are recorded as expenses as a net reduction against fee income. In addition, a portion of the payment received represents interchange fees, which are passed through to the card issuing bank. Income is primarily earned based on the dollar volume and number of transactions processed. The performance obligation is satisfied, and the related fee is earned when each payment is accepted by the processing network.

Note 19 – Grant Income

In September 2023 and May 2022, the Bank was awarded a $437,000 grant and a $171,000 grant under the U.S. Department of Treasury's Community Development Financial Institution ("CDFI") Bank Enterprise Award Program ("BEA Program"), which is intended to increase investments to communities experiencing severe economic distress. The $427,000 and $171,000 grant proceeds were received and recognized into income in the years ended December 31, 2023 and December 31, 2022, respectively, after meeting the performance goals and measures of the grant award agreement.

In April 2023, the Bank was awarded a $4,958,000 grant from the U.S. Department of Treasury as part of the CDFI Equitable Recovery Program ("ERP") which aims to help CDFIs further their mission of helping low and low-to-moderate income communities recover from the impact of COVID-19. The ERP grant award proceeds were received and recognized into income in the year ended December 31, 2023 after meeting the performance goals and measures of the grant award agreement.

Note 20 – Subsequent Events

The Company's board of directors declared a cash dividend of $0.15 per share on February 27, 2024. The dividend will be payable on or about April 2, 2024 to shareholders of record as of the close of business on March 20, 2024.

The Company recognizes in the consolidated financial statements the effect of all subsequent events (transactions or events that occur after the balance sheet date but before the consolidated financial statements are issued) that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing the consolidated financial statements. The Company's consolidated financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the consolidated statements of financial condition but arose after the consolidated statements of financial condition date and before consolidated financial statements are available to be issued. The Company has evaluated subsequent events through April 9, 2024, which is the date the consolidated financial statements were available to be issued.
